TEXA

TPMS solutions

More vans and trucks are being fitted with tyre pressure monitoring systems, which have been seen to make a major contribution to road safety. TEXA has developed a dedicated solution for checking the correct functioning of these systems.

TPS

The TPS is TEXA's basic tool for tyre-related operations. It boasts an exceptional coverage of makes and models as well as TEXA's traditionally robust design and build quality. The TPS communicates with the valve sensors on each wheel, activates them if they are in standby and verifies their efficiency. The tool's own display reads out pressure, temperature and battery charge level (where available), as well as the identification codes and other diagnostic information provided by the vehicle manufacturer. The TPS lets you check the efficiency of tyre pressure sensors so that you can change them if necessary.

APP TPMS Repair

The TPS integrates perfectly with all the other TEXA diagnostic products in your workshop. The free "TPMS Repair" app can connect with any PC running TEXA IDC5 software or with AXONE Nemo.
